Appendices

A Media Power by Country

These tables show weighted and unweighted estimates of the reach, attention share, and power index for the top 15 sources in each of the 36 countries in our sample. Conglomerate media organizations and their prominent subsidiaries are identified in the footnotes. We do not identify subsidiaries that are not included in the Reuters sample.

TABLE A1: ARGENTINA

	Unweighted			Weighted		
Media Organization	Reach	Attention Share	Power	Reach	Attention Share	Power

B Extended Regression Results

B.1 Predictors of News Consumption by Country

These plots show point estimates and 95% confidence-intervals from country-level OLS regressions of the number of news sources an individual uses on demographic characteristics. Figure II illustrated global trends, but of course we find there is significant country-level variation as well. Data on political ideology is available for only six countries: Denmark, Germany, Italy, Spain, the United Kingdom, and the United States. These countries are shown last.

FIGURE B1: PREDICTORS OF NEWS CONSUMPTION BY COUNTRY

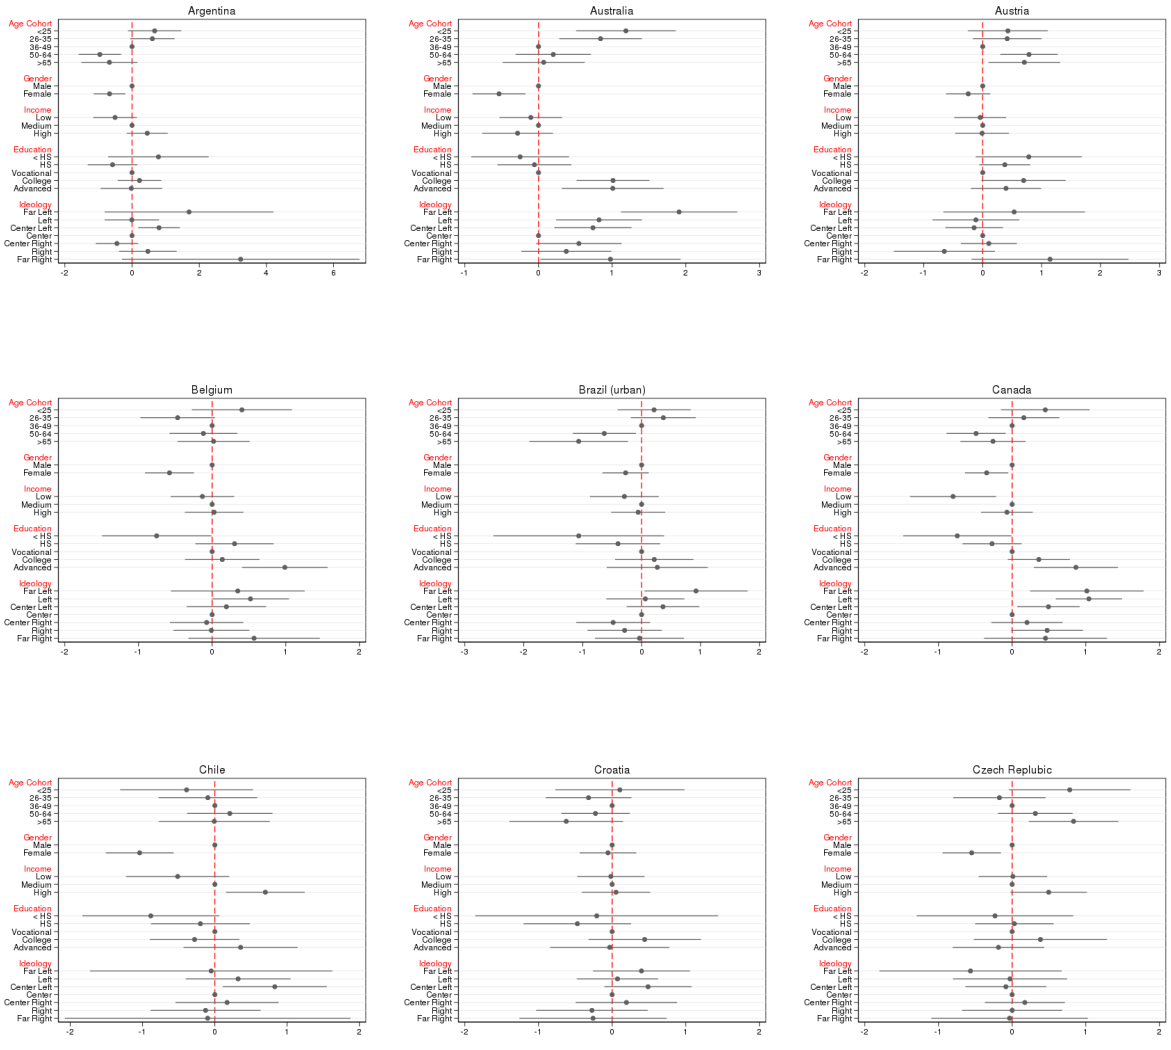

FIGURE B1 (CONT): PREDICTORS OF NEWS CONSUMPTION BY COUNTRY

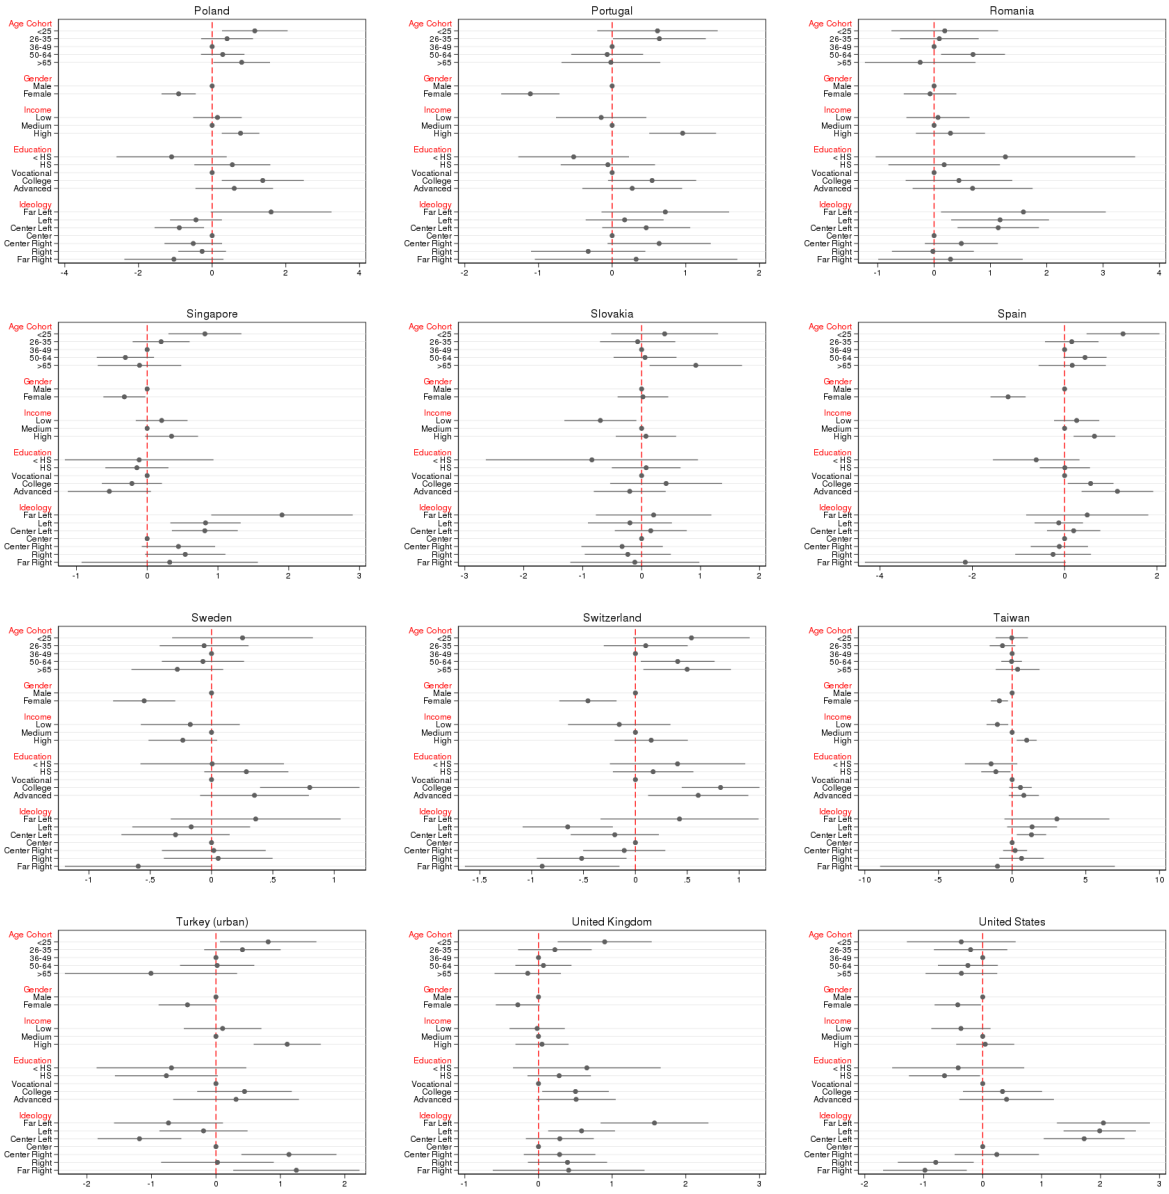
FIGURE B1 (CONT): PREDICTORS OF NEWS CONSUMPTION BY COUNTRY



B.2 Predictors of News Consumption: All Countries

Figures II and VII plot the coefficients from regressions of the number of sources an individual uses, and public versus private media usage, on individual characteristics. We report these results with additional detail below in table format.

TABLE B1: PREDICTORS OF NEWS CONSUMPTION: ALL COUNTRIES
